

## Easy Handling of Round or Square Bales from a Name You Trust.

The BS10 & BS20 Series Bale Spears can be attached to CTLs, skid steers, or tractor loader arms fitted with a skid mounting plate. BSE units fit the Euro-Hitch plates. The single-spear BS10 utilizes two smaller stabilizer spears to keep bales from rotating on the main spear and feature a 3,000 lb. lifting capacity. The dual-spear BS20 features two 45" spears that perform well on round or square bales. The BS20 lifting capacity is 3,000 lbs. Both units are American-made and have a 1-year limited warranty.
