is available for your cart!**

# UHarvest® Lite Scale System

The UHarvest® Lite scale system offers complete ISOBUS grain cart scale operation for quick, convenient and accurate field-weighing capability. It simply connects the grain cart scale load cells using an ISO cable into the tractor's ISOBUS outlet. Grain cart load weight is then easily viewed on the tractor's virtual terminal, eliminating the added need for traditional scale displays.

- Accu-Save feature automatically registers each load and displays up to 400 unloading events that are easily referenced on the tractor's virtual terminal display showing weight, date and time
- Hitch-weight monitoring for easily managing load balance between cart and tractor for optimum field control
- Available as factory-installed on Brent, Killbros, Parker and Unverferth brand grain carts
- Also available for field installation on any brand grain cart already equipped with scales
- Works with any brand of ISOBUS VT monitor

UHarvest Lite was developed in conjunction with Raven Industries and designed specifically for ease of use and reliable, long-term performance. See your nearest Brent, Killbros, Parker or Unverferth dealer today or [u harvest.net](http://u harvest.net) for complete details.

Combine Verify feature for easy combine yield monitor calibration

UHarvest Lite scale package displays up to 400 unloading events showing weight, date and time

If more detailed downloadable grain cart data is desired, the UHarvest Lite scale system can grow with your needs and be easily upgraded to the complete UHarvest® data management system by simply adding the appropriate cabling and a processor.

The full-featured UHarvest® system takes weighing systems to the next level by combining the reliability and accuracy of grain cart scales with state-of-the-art tablet or VT touchpad usability and software for easily analyzing as much harvest data as you want.

- Accu-Save data recording
- Grower, farm and field information
- Truck, destination and variety tracking
- Calibrate combine yield monitor
- Hitch-weight management
- USB data management
- Multiple user access
- UHarvest Cloud solution
- Optional Moisture Sensor
- Optional Accu Unload capability
