BROWN HYDRAULIC TREE SAW

Brown Tree Saw, designed for skid steers.

Brown Tree Saws are designed to be rugged machines that can handle selective clearing of wood lots, fence rows, food plots and ATV/bike trails. The heavy construction is tough enough to cut heavy brush and trees up to eight inches in diameter. The balanced blade keeps vibration to a minimum.

All models have a one year warranty on non-wear components.

Standard 3 button wiring harness is included to remotely operate the rotating head and herbicide sprayer from the operator's station. 8 pin and 14 pin connectors are also available to hook up to your skid steer's internal controls. Mining grade saw blade tips are used to allow below ground cutting when desired. Our saw blades are designed with a "through bolt" with nylon lock nut for the carbide blade tips for safety and ease of maintenance. The saw blade is designed with a limiting crown to keep the blade from binding when cutting large diameter material. Our machines are supplied with bent axis piston motors.

Models Available	Blade / Motor	GPM Required
HTS3-3620BA	36" Blade, Bent Axis Piston Motor	20 GPM
HTS3-3640BA	36" Blade, Bent Axis Piston Motor	40 GPM

General Specifications

Height of Cut	Ground Level
Construction	All Welded Steel
5 Gallon Herbicide Sprayer/Tank	Adjustable Tip Spray Nozzle
Hardened Steel Blade	36" w/ 12 Replaceable Carbide Overlay Teeth
Weight	1200 lbs.
Flat Faced Connectors	1/2" Male/Female Pressure & Return 3/8" Female Case Drain
