

# Fransgård

## V-4000/V-5000/V-6500 Radio Remote operated winch

Clutch active

Winch on standby

Mounting kit

**This is the newest machine in the Fransgård forestry products program. Fransgård is now offering a less expensive radio controlled winch. The winch is a standard latch- brake winch added with a 12 Volt electric spindle, and remote. This radio remote system performs with ease. Important: the brake is NOT operated by the remote control. This must still be done manually.**

- **Radio controlled winch with FCC approved bandwidth for North America, prevents accidental operation from outside source!**
- **Easier Operation**
- **Technical data for the winch can be seen on the latch- brake winch leaflet**
- **Including spindle attachment**
- **Including remote control – working range approx 75 meter /240 ft depending on interference**

**Order no.: 1530 – in US 1531**
