

Simply MORE, start to finish.

# Step up to the tractor that's bigger than it looks.

History proves that nobody knows how to get more out of a compact tractor than Massey Ferguson®. And we're proving it again, by making sure our new GC1700 Series delivers more performance than ever. With up to 25 gross engine horsepower and unmatched versatility, these easy to drive, multi-tasking workhorses can handle everything from mowing, loading and backhoeing to snow blowing and more. So when you're ready for a real tractor, check out the GC1700 Series. It'll give you all it's got – and then some.

## Need a reason to believe? How about five of them?

Whether you're a residential customer or a seasoned professional, everything about the GC Series proves it's made for you.

### 1 Largest engine in its class

More cubic inches translates into higher reserve torque and more efficient use of useable horsepower. And our all cast-iron construction delivers higher durability and longer engine life versus cast-iron blocks with aluminum heads.

### 2 Comfortably familiar operator's station

Providing more than just great ergonomics, the operator's station on the GC Series makes the transition from lawn tractors into small compacts as seamless as possible, with all major controls and functional pedals in similar locations.

### 3 Professional quality mowing decks

For residential or commercial use, our 10-gauged stamped, full floating decks deliver a top-notch cut on all types of terrain. All spindle assemblies are made of cast-iron, for greater durability versus the competition's aluminum casted spindle housing.

### 4 Outstanding material handling

When it's time to handle material, you'll notice the difference – even when compared to our competitor. With dual bucket cylinders, our DL100 loader simply delivers better performance and higher durability than loaders with single cylinder bucket design.

### 5 Your choice of backhoes

The GC-series offers the CB05 backhoe model. The 6.5' full size model offers features and performance the top competitors just can't match. Larger diameter cylinders, larger capacity buckets, and our exclusive "Boom Float Control" make this backhoe the easiest and most powerful backhoes in their class.

For both residential and professional operations, the GC-series delivers across the board – from easier operation and greater comfort to reducing fatigue, improving safety and maximizing productivity.

Our powerful front-end loaders with dual bucket cylinders maintain an even force across the bucket to keep it from getting out of line.

Curved-boom backhoes let you maximize digging depth.

Cruise control takes the fatigue out of any job.
