

Classic Teat Liner

for narrow teats and optimum cow comfort

GEA Milking & Cooling | WestfaliaSurge

engineering for a better world

GEA Farm Technologies

Classic Teat Liners – always the best fit!

Faster milking without extra handling

For maximum yield and optimum cow comfort the best liners fit the teats - like a glove.

An optimum fit is offered by the GEA Farm Technologies Classic Teat Liner - especially suited to narrow teats:

for a perfect fit on the udder

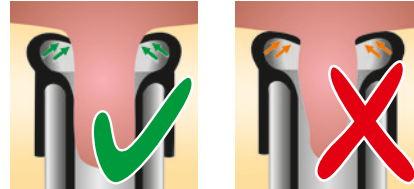

- reduced air admission
- improved adhesion to the teats
- less slips
- optimum milk extraction
- higher throughput

for improved udder health and teat condition

Precise measurement of the teat: means correct liner fit to maximise milk yields.

The advantages of a 3 piece liner:

1. The combination of teat liner, sight glass and short milk tube allows flexible adaptation to suit any udder conformation.
2. Short milk tubes of different lengths can be used and changed as required.
3. Milk flow can be seen through the sight glass: for better milking observation.

Recommended use for 7021-2725-350

Breeds					
Space between rear teats					Ø of the teats from 20 to 27 mm
Teat shape:					
Shaft:	cylindrical	cylindrical	conical	conical	
Base:	angled	funnel-shaped	angled	funnel-shaped	
Special features	also for StimoPuls	Vacuum - milking parlour 38-42 kPa - stanchion barn 42-45 kPa		Only for the fold away CIP unit with support ring.	
Replacement interval / Service life	6 months*	or	750 hours of operation*		

* whichever is earlier
