

XV

A LARGER BUCKET FOR LIGHT MATERIALS

To widen the range of buckets we have developed a new larger volume bucket for use with heavier machines. The Volume Bucket XV is designed with light weight material in focus which gives a higher load capacity. The bucket has been reinforced in areas with higher stress, is despite its size quite light.

XV	240	260	280	300
WIDTH, CM	251	268	291	314
DEPTH, CM	136	136	156	171
HEIGHT, CM	124	124	132	147
VOLUME (HEAPED), M ³	3.0	3.2	4.0	5.0
